

# CS5223 Assignment 1 Demo Schedule

1. Each team will be allocated a 20 minutes demo session. Each of these sessions is a separate Zoom meeting with different meeting ID and password to ensure its privacy. The TA will separately email the ZOOM link and password to each group by 1<sup>st</sup> October 2020.
2. Before the meeting, as a warm up, please download your code from LumiNUS into a local folder, re-compile and run it once yourself. Delete these local files after the warm up.
3. At the allocated time, all team members must connect to the Zoom meeting, and TAs will check the Student ID of all team members. We can only proceed when all members are present and have all had their Student IDs checked.
4. Our teaching assistant (TA) will ask you to confirm that you have completed warm up.
5. One of the members should be the representative for the team. The representative student should share his or her desktop screen.
6. Login to LumiNUS, download your code into a local folder, re-compile it and pause for instruction.
7. TA will start the Zoom meeting recording function.
8. During the demo, TA will record down the number of checkpoints successfully passed and the first step if there is any error. Such records will be shown to the entire team at the end of the demo.
